

Product Discontinuation Notification

① Product Information

| | |
|--|---------------------------------------|
| Name of Product: Easy Fit Step Lamp | Date of Issue: 14/11/2017 |
| PDN No: PDN1005 | PDN effective Date: 31/01/2018 |

② About:

Introduction:
The Easy Fit step lamp range has been superseded by a newer design incorporating newer electronics and LED technology. The external dimensions are very similar, but the mounting method has changed slightly.

What's different?
Better light output.
Modern surface mount LED.
Clip-on cover not through-hole.

Why the change?
Significant improvements in light output
Reduced power consumption and increased efficiency
Reduction of potential water ingress.
In addition to the above benefits, we have reduced the range as part of our complexity reduction program. This makes it simpler to quote, stock and supply for the benefit of distributors and customers.

Things to look out for.
The new cap is a clip-on vs. the old design being push-through
It is now possible to remove the cap if needed; the old design made this impossible without damage to the cap.
Stainless steel version is essentially the same method of fitting as it uses exactly the same 316 SS metal cap.
