

Nylon Brait \ Eight - Strand Plaited Nylon Rope

Applications: Docklines and anchorlines

Construction: 8-strand Nylon

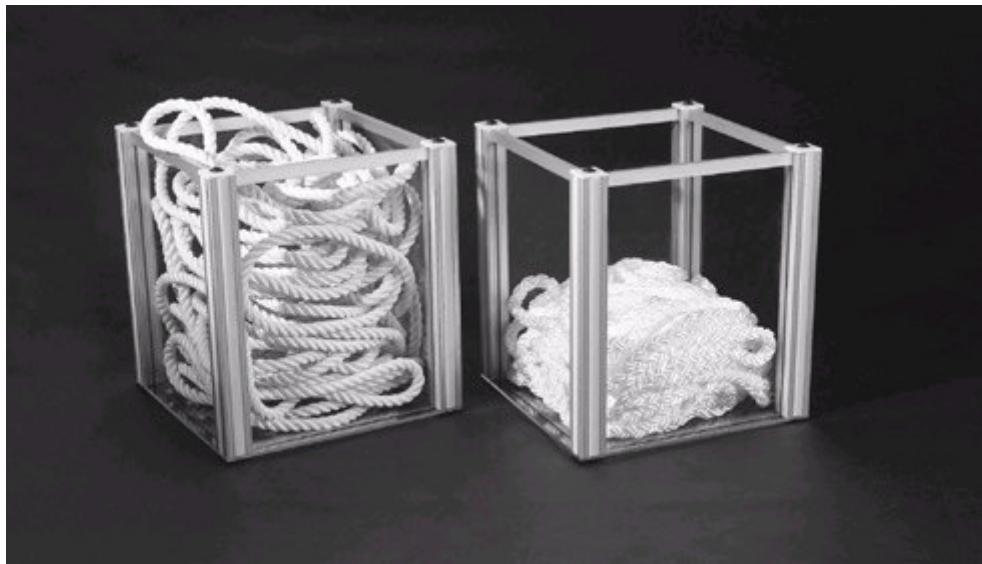

Nylon Brait™ is an 8-strand nylon rope created through braid technology that yields a product with a firm strand formation yet full stowage flexibility. The unique construction offers maximum strength and energy absorption, and working windlass grip-hold.

Specific Gravity: 1.14

Color Code: White

Data

| Diameter | | Weight | | Strength Approx. Avg. | |
|----------|------|-----------|---------|--------------------------|-------|
| Inches | MM | Lbs/100ft | Kg/100m | Lbs | Kg |
| 3/8 | 9 | 3.83 | 5.7 | 4,000 | 1,814 |
| 1/2 | 12 | 6.10 | 9.1 | 8,300 | 3,765 |
| 17/32 | 13 | 6.42 | 9.6 | 9,200 | 4,173 |
| 5/8 | 16 | 9.37 | 13.9 | 12,200 | 5,534 |
| 21/32 | 16.5 | 9.63 | 14.3 | 12,900 | 5,851 |
| 11/16 | 17.5 | 11.00 | 16.4 | 15,000 | 6,804 |
| 3/4 | 18 | 14.00 | 20.8 | 17,000 | 7,711 |

On the left, 150' of 3-strand nylon rope. On the right, 150' of Yale Nylon Brait. Brait's 8-strand weave makes it much more supple, easy to handle, and yields a very soft hand.
