

DS-HD6-BLK Double Horizontal Cable Seal

The DS-HD6-BLK double cable seal was designed to eliminate time-consuming and sub-standard routing of solar panel cables.

Our seal helps you achieve a sleek, easy-to-fit, and 100% watertight installation every time. Perfect for routing two solar panel cables externally to internally on the roof of boats.

- Designed for solar panel installations.
- IP68 watertight seal.
- Install 2 cables - 5mm (0.19") and 6mm (0.23") in any combination.
- Compact footprint - just 54mm (W) 63mm (L) 24mm (h).
- Makes it perfect for installing as close to the solar panel as possible.
- Easy fit cable routing that cuts down your installation time through wood, metal, and GRP.
- Black high impact plastic.
- Includes 316 stainless steel fixings and a waterproof 3M gasket.
- The low-profile construction is impact-resistant and provides extra protection from water.
- Our materials have been selected to be UV- stable and hard-wearing.
- No messy sealant on bungs.
