

PTM-R1-SL

Tapered Mast for Radar, Starlink, Thermal Camera and Aerials

This remake of our classic Tapered Mast mount has been designed to provide optimal ease of installation while creating a robust and aesthetically pleasing mount adaptable for multiple different technologies on one mounting platform.

Now made easier to install, the PTM-R1-SL features access panels under each “wing” to allow for easy access and quick and simple cable routing. The design also focuses on ensuring that NMEA connectors fit within the mast and the wings, eliminating the need to remove the connectors for installation.

Suitable for mounting radar, lights, Satcom, Starlink, GPS/VHF antennas, and cameras seamlessly together.

- Mount Radar, thermal camera, aerials, and Starlink high-performance in one installation
- Constructed from marine-grade aluminum
- Paint finishes comply with our unique 4-step marine paint system
- Access panels on the underside of the wings for ease of wiring
- Watertight installation
- Pre-drilled mounting holes allow the radar to fasten straight to the mast with its own mounting bolts
