

Installation and Care Instructions

TELE-OUTRIGGERS

INTRODUCTION

The TACO TELE-OUTRIGGERS will offer trouble-free performance, with proper use & maintenance.

WARNING

High speed cruising in rough seas is not recommended. High speed cruising with the outriggers fully extended can cause possible damage to the outrigger sections and internal components of the aluminum outrigger. Retract your TACO TELE-OUTRIGGER before operating under those conditions.

Excessive release clip tension or faulty clips can cause unnecessary loads on outriggers and mounts. Adjust and check clips before each use.

Do not dent any of the tubes. Do not tamper with the eyelets as they are preset during assembly.

OPERATION TIPS

Whenever possible, extend TACO TELE-OUTRIGGERS while in mount or free-standing. Gently pull to the end of each section keeping eyelets lined up. Once in position, rotate until spring-loaded locking buttons engage.

MAINTENANCE

Wash with fresh water in the fully extended position after each use. Spray all exterior and inside locking components with a quality lubricant then lightly wipe down with soft cloth. (Silicon based lubricants are not recommended).

PREMIUM RIGGING KIT

The pad eye that the bungee hooks onto is usually installed on the gunwale about 6" toward the stern, between the outrigger holder and the rod holder.

On the T-top the pad eye is usually hooked onto the outer t-top ring so it can be easily reached.

TACO Grand Slam 370 Mounts

- Fully adjustable from under the top
- For use on both soft and hard tops
- Fold-up crank handle for maximum clearance

TACO Grand Slam 270 Mounts

- 12 locking positions
- Rotator handle positioning installs to avoid obstruction
- Rotate outrigger position from under the top
- Lay down arm for bridges & trailering

TACO Sport Slam Mounts

- Easy to install
- Pull pin for multiple fishing positions
- Operates above the top
- Lay down arm

TACO Outrigger Line Caddy

- Clamp to Tele-Outriggers
- Eliminates rigging from tangles when retracted
